

Technical Support Engineer

The Geo++ GmbH is a world-wide acting company specialized on high precision GNSS positioning technology. Geo++ GmbH produces the GNSS reference service software Geo++ GNSMART. It serves to create and distribute augmentation data for DGNSS and innovative SSR applications and is used in various countries around the globe. The requirements of precise positioning increase steadily. This requires a high degree of automation and the integration of several new and innovative technologies.

We are looking to recruit as soon as possible a Bachelor/Master of Science in geodesy or geoinformatics for our technical support team.

Your Tasks:

- Consulting, implementation and configuration of our software for GNSS services, RTK systems and special applications
- Provision of technical support to customers
- Conduction of training courses
- Analysis of GNSS data
- Quality assurance of our GNSS software

Your Profile:

- Degree in geodesy, geoinformatics or similar qualification
- Good knowledge about GNSS
- Good knowledge of German and English, both spoken and written
- Good understanding of complex structures
- Creativity and ability to work in teams
- Ability to work independently
- Interest in new tasks
- Willingness to travel
- C/C++ and/or Java development experience is beneficial

Interested? Please send your application documents to temmo.wuebbena@geopp.de or to
